PROFILE

IT undergraduate at the Institute of Technology, University of Moratuwa (ITUM) with practical experience in full-stack web and mobile development. Skilled in building RESTful APIs using Python (FastAPI) and developing user interfaces with React and Flutter. Possesses foundational knowledge in DevOps practices (Docker containerisation and CI/CD basics with GitHub Actions) and actively expanding these skills. Seeking a Software Engineering Internship to apply technical knowledge in production environments.

TECHNICAL SKILLS

LANGUAGES
JavaScript (ES6+), Python, HTML5, CSS3

FRONTEND & MOBILE
React, Tailwind CSS, Vite, Flutter

BACKEND & APIS
FastAPI, Node.js, Express.js (Basics), REST APIs

DATABASES
PostgreSQL, MongoDB

TOOLS & DEVOPS
Git, GitHub, GitHub Actions, Docker, Vercel, Postman, VS Code

ARCHITECTURE & CONCEPTS
OOP, Microservices, SDLC, CI/CD Basics, Clean Code

SOFT SKILLS

Problem Solving • Team Collaboration • Fast Learner • Effective Communication • Adaptability • Time Management

CERTIFICATIONS

Full Stack Open (Parts 0–5)
University of Helsinki • 2026
Modern web development covering React, Node.js, Express, REST APIs, and automated testing (5 ECTS credits).

• *Continuing Parts 6–13 (State Management, Relational DBs & Containers).*

EDUCATION

National Diploma in Technology (NDT) — IT — 2024 – Present
Institute of Technology, University of Moratuwa (ITUM)
Specialising in Information Technology • Final Year Undergraduate

G.C.E. Advanced Level — Physical Science — 2022
Badulla Central College

PROJECTS

MicroLink — Microservices Demo Platform — ACADEMIC PROJECT
Flutter • Python • FastAPI • PostgreSQL • Docker • REST API
- Designed a multi-service architecture with decoupled FastAPI backend services communicating via REST endpoints.
- Built a responsive Flutter frontend consuming backend APIs; containerised services with Docker for local testing.
- Configured structured PostgreSQL database schemas with separation of data concerns across services.

ShopLK — E-Commerce Web Application — IN PROGRESS
↗ **shoplk-fullstack.vercel.app**
React • Tailwind CSS • JavaScript (ES6+) • Vite • Vercel
- Developed a modern, responsive e-commerce frontend interface with product catalog, cart flows, and smooth UI.
- Styled using Tailwind CSS for full mobile and desktop responsiveness; deployed live on Vercel.
- Backend integration with Express.js and MongoDB currently in development.

Settle Up — Expense Splitting Application — LIVE DEMO
↗ **sandali011.github.io/settle-up**
React • JavaScript • Tailwind CSS • GitHub Pages
- Built an intuitive expense-sharing web utility to track group expenses, compute net balances, and settle debts.
- Utilised React state management for instant calculations and client-side persistence; deployed via GitHub Pages.
