TECHNICAL SKILLS

LANGUAGES

JavaScript · Python · HTML5 · CSS3

FRONTEND & MOBILE

React · Tailwind CSS · Vite · Flutter

BACKEND

FastAPI · Node.js · Express.js · REST APIs

DATABASE

PostgreSQL · MongoDB

TOOLS

Git · GitHub · Docker · Vercel · Postman · VS Code

CONCEPTS

OOP · Microservices · SDLC · CI/CD · Clean Code

EDUCATION

NDT — Information Technology
Institute of Technology,
University of Moratuwa (ITUM)
2022 – Present · Final Year

G.C.E. Advanced Level
Physical Science
Badulla Central College
2021 · 2C, 1S

LANGUAGES

Sinhala — *Native*
English — *Professional*

D.M.S.A.K Dissanayaka

FULL-STACK DEVELOPER • IT UNDERGRADUATE @ UNIVERSITY OF MORATUWA

ABOUT ME

Final-year IT undergraduate at the Institute of Technology, University of Moratuwa (ITUM), passionate about building clean, scalable software solutions. I develop full-stack web applications using **React**, **Python (FastAPI)**, and **Node.js**, with hands-on experience in REST API design and database management. I have foundational knowledge in DevOps practices — including Docker containerisation and CI/CD pipelines via GitHub Actions — and am actively deepening these skills. Currently completing the University of Helsinki's Full Stack Open certification and eager to contribute as an intern or junior developer.

PROJECTS

MicroLink — Microservices Demo Platform

Academic

Flutter • Python • FastAPI • PostgreSQL • Docker • REST API

- Designed a multi-service architecture with independent FastAPI services communicating via REST endpoints.
- Built a cross-platform Flutter frontend consuming RESTful APIs; services containerised using Docker.
- Implemented PostgreSQL schemas for structured data management across service boundaries.

ShopLK — E-Commerce Frontend

In Progress

↗ shoplk-fullstack.vercel.app

React • Tailwind CSS • JavaScript • Vite

- Built a responsive e-commerce frontend with product listing, cart management, and navigation using React.
- Styled with Tailwind CSS; deployed to Vercel. Backend integration currently in development.

Settle Up — Expense Splitter

Live

↗ sandali011.github.io/settle-up

React • JavaScript • Tailwind CSS • GitHub Pages

- Web application to split shared expenses, track debts, and settle balances within groups.
- Client-side state management with React hooks; deployed via GitHub Pages.

CERTIFICATIONS

Full Stack Open — Parts 0 to 5

2026

🏫 University of Helsinki — Verified Certificate

A rigorous, university-accredited programme covering modern full-stack web development — React, Node.js, Express, REST APIs, state management, and automated testing. Equivalent to **5 ECTS credits** from one of Europe's top-ranked universities.

▶ *Currently continuing Parts 6–13: Containers, Relational DBs, TypeScript & CI/CD workflows.*

React · Node.js · Express · REST APIs · Testing
